

Haven II  
Roy & Kathi Merritt

March 2007

All ceiling framework is up. George the Electrician has been at it for almost a week. He says he'll have the house wired by the end of Monday or Tuesday.

Charles the Welder still has far to go on the burglar bars.

The Septic Tank Team is about a quarter of the way down. The animation in this picture was motivated by the presence of a camera.

These STT guys say they need more food. "More food for more power!"

They are also generating a pleasing amount of land fill which I intend to use in the foundation box for . . . you guessed it . . . **Haven Three**.
